Minutes of Meeting

Meeting	Meeting related to In House CMS development
Held on	5Th August 2014 Time : 3.00 PM to 3.30 PM , GMRT canteen Annex room (Telephonic)
Attendees	NGK, SN, DBB & RRU
Agenda	In House CMS development
Highlights and items discussed	<ul style="list-style-type: none">◆ RRU updated he has understood the Alarm program used in current Online given by Santaji. - Working on servo communication, observed some times PC104 doesn't send the final response. Discussed with Thiyagu. Thiyagu pointed out that it is because of software limit imposed in servo software. +/- 260 for AZ angle & +/- 16.5 for EL angle.◆ NMS programmed one MCM with additional command to set reference LO, gave that MCM card to GAB group.◆ SNK updated tax program is ready & available on GMRT web page.◆ DBB updated the he is working on precession coordinate calculation using NOVAS library. Apparent calculation are not matching. - Topo- centric calculations are giving correct output but geocentric calculations are giving error. - DBB busy in writing report on beam-width. # NGK asked to put all calculations related to precessed coordinate and Nutated coordinate.◆ SN updated that he is receiving emails from vendors related to server class machines.
